

QUALITY ASSURANCE CONSULTING SERVICES

SOUND ADVICE AT EVERY STAGE OF YOUR PROJECT

INNOVATIVE QUALITY ASSURANCE SOLUTIONS

Whether you are a developer, contractor, design professional, or building owner, Professional Investigative Engineers has the experience and ability to assist with your next building project.

In addition to working in the forensic market, many of our staff have been and remain intimately involved in the design, oversight, project management, and quality assurance of the new construction and rehabilitation industry. We have been involved in both the “front end” and the “back end” of construction projects, and therefore we understand what things can go wrong and where focus should be given.

PIE specifically tailors all of our third party services to individual clientele’s specific needs and requests. Our consulting and quality assurance services are specialized for your individual project design, parameters, and requirements.

PIE’s specialized consulting services are custom tailored to your project goals.

WHAT WE DO

- Design Development Consultation
- Technical Plan and Specification Reviews
- Customized Training Seminars
- Quality Assurance Observations and Reporting
- Building Performance Testing
- Pre-Turnover Compliance Studies

WHOM WE SERVE

- Developers
- Design Professionals (Architects and Engineers)
- General Contractors
- Construction and Project Management Professionals
- Design-Build Contractors
- Building Owners

WHY WE ARE DIFFERENT

- In addition to applicable in-field experience, all of our quality assurance project manager’s have Bachelor of Science degrees in engineering, and many have advanced degrees in their respective disciplines.
- PIE staff regularly pursue outside training and certification programs in the areas of engineering and construction so as to keep abreast of the latest advancements in the industry.
- All of our personnel have the benefit of being actively involved in the forensic evaluation of existing properties as a result of design or construction related deficiencies.
- We forge solid working relationships with the entire project team to enhance communications and the transfer of information, resulting in a successful quality assurance program that adds value to our client.

AREAS OF DISCIPLINE

- New Construction and Rehabilitations Projects
- Total Enclosure Commissioning (PIE-TEC) Program - Air, Water, Thermal Barriers, and Vapor Barriers
- Building Science
- Roofing and Waterproofing
- Façades and Wall Claddings
- Fenestrations and Curtain Walls
- Below-Grade Waterproofing and Plaza Decks
- Civil
- Structural
- Sound Transmission/Acoustics
